

ECONOMIC SERVICE SHEEP & BEEF FARM SURVEY

TARANAKI / RANGITIKEI / MANAWATU

2023-24 NEW SEASON FORECAST & QUINTILE ANALYSIS
OF FINAL 2021-22 SURVEY DATA | P23016

Dear Farmer / Industry Professional

The following analysis of the 2021-22 Sheep and Beef farming year is ranked by Earnings (Profit) Before Interest, Tax, Rent and manager wage (EBITRm) per hectare. South Island classes 1 and 2 are ranked nationally by EBITRm per stock unit (EBITRm/SU) due to their scale and extensive management systems. It summarises the key performance indicators from over 2,000 data points collected each year from each of our survey farmers.

This document is available from the data & tools section of the beeflambnz.com website.

For each farm class (see 'Farm Classes Defined') a graphical analysis at regional level details the survey outcome for farms surveyed for 2021-22 against the regional mean, provisional results for 2022-23 and our forecast for 2023-24.

Forecasts represent the best information available to us at time of publication. We thank our survey farmers who make these data available for industry good.

The Survey and Source of Data

The Sheep and Beef Farm Survey is a sample survey of approximately 510 farms. The sample is randomly selected and stratified by geographical regions and by sheep and beef cattle stock units. Data associated with physical and financial aspects of sheep and beef farming are recorded.

Statistical Requirements

The survey observes two fundamental principles:

1. The sample size is large enough to avoid the undue influence of abnormal items; and
2. The selection of farms has been made at random, so that each and every unit of the population has had an equal chance of being selected.

The frame used for the random sampling is a comprehensive list of sheep and beef farmers. In order that the selection of farms is made as representative as possible, considerable use is made of existing empirical knowledge about sheep and beef farming.

Farm Classes Defined (ordered extensive to intensive by Island)

North Island

Class 3. N.I. Hard Hill Country 920 Farms - Steep hill country or low fertility soils with most farms carrying 6 to 10 stock units per hectare. While some stock are finished a significant proportion are sold in store condition.

Class 4. N.I. Hill Country 3,055 Farms - Easier hill country or higher fertility soils than Class 3. Mostly carrying between 7 and 13 stock units per hectare. A high proportion of sale stock sold is in forward store or prime condition.

Class 5. N.I. Finishing 1,045 Farms - Easy contour farmland with the potential for high production. Mostly carrying between 8 and 15 stock units per hectare. A high proportion of stock is sent to slaughter and replacements are often bought in.

South Island

Class 1. S.I. High Country 200 Farms - Extensive run country located at high altitude. These farms run a diverse mix of operations which include breeding sheep, often fine woolled, breeding cows and deer. Stocking rate is typically up to three stock units per hectare. Located mainly in Marlborough, Canterbury and Otago.

Class 2. S.I. Hill Country 620 Farms - Traditionally store stock producers with a proportion sold prime in good seasons. Carrying between two and seven stock units per hectare, they usually have a significant proportion of beef cattle.

Class 6. S.I. Finishing Breeding 1,820 Farms - Farms which breed or trade finishing stock, and may do some cash cropping. A proportion of stock may be sold store, especially from dryland farms. Carrying capacity ranges from 6 to 11 stock units per hectare on dryland farms and over 12 stock units per hectare on wetter or irrigated farms. Mainly in Canterbury and Otago, this is the dominant farm class in the South Island.

Class 7. S.I. Finishing 1,040 Farms - High producing grassland farms carrying about 9 to 14 stock units per hectare, with some cash crop. Located in Southland, South and West Otago.

Class 8. S.I. Mixed Finishing 465 Farms - Located mainly on the Canterbury Plains. A high proportion of their revenue is derived from grain and small seed production, as well as stock finishing or grazing.

Measures Used in this Report

Farm Profit before Tax – Gross Farm Revenue less Total Farm Expenditure (which includes Interest, Rent, Depreciation and any Manager Salary paid).

Earnings Before Interest, Tax, Rent and manager wage (EBITRm) – Farm Profit before Tax, Interest, Rent and any Manager Salary paid.

EBITRm is a standardised metric for comparison with other farms on the common basis of farms being:

Debt-free, i.e. before Interest paid

Tax, i.e. before Tax is paid

Freehold, i.e. before Rent paid

Owner Operator, i.e. before manager salary paid

Gross Farm Revenue (GFR) – the total revenue earned from the year's farming operations. From this, Total Farm Expenditure that was spent to generate the farm revenue is deducted to show the Farm Profit Before Tax for the year.

Economic Farm Surplus (EFS) – the return available to the owner-operator of a freehold, unencumbered farm after allowance has been made for labour and management input. It is calculated as follows:

$$\text{EFS} = \text{Farm Profit Before Tax} + \text{Managerial salaries} + \text{Interest paid} + \text{Rent paid} - \text{Assessed Owner Reward}$$

(equivalent ruling wage for an experienced farm worker + 1% of farm capital for management).

Rate of Return on Total Farm Capital (ROR on TFC) – EFS as a percentage of Total Farm Capital. Total Farm Capital is defined as Farm Capital (farm assets at market value) plus an allowance for working capital. The working capital allowance is necessary because of timing differences between farm revenue and expenditure resulting in overdrafts to finance expenditure, or high credit balances to pay for upcoming expenditure. The working capital allowance is assumed at 50 per cent of the sum of Working Expenses and Assessed Owner Reward.

Lambing % – The number of lambs tailed from ewes as a percentage of ewes mated in the previous autumn (adjusted for the sale or purchase of in-lamb ewes and sale of dry ewes sold prior to 30 June).

Calving % – The number of calves marked as a percentage of cows mated (adjusted for empties sold before 30 June and the sale or purchase of in-calf cows).

Report Title

Indicates which Farm Class and Region is being benchmarked. Please note Farm Classes 1 and 2 are ranked by EBITRm/SU.

Report Headers

Class	The farm class (refer Farm Classes Defined)
Unit	The unit of measure of each metric
Q1 low 2021-22	Quintile 1 - the 0-20% of sample ranked by EBITRm/ha
Q2 2021-22	Quintile 2 - the 21-40% of sample ranked by EBITRm/ha
Q3 2021-22	Quintile 3 - the 41-60% of sample ranked by EBITRm/ha
Q4 2021-22	Quintile 4 - the 61-80% of sample ranked by EBITRm/ha
Q5 high 2021-22	Quintile 5 - the top 20% of sample ranked by EBITRm/ha
Mean 2021-22	The arithmetic average of the sample
Prov 2022-23	Provisional results for the class financial year ending June
Forecast 2023-24	Our forecast for the class financial year ending June
