

Every ram decision shapes tomorrow's flock

Use nProve tools to select rams and measure genetic progress.

Breeders record performance data

Performance data recorded by stud breeders is loaded into nProve for genetic evaluation.

- ✓ Performance recording
- ✓ Data loaded into nProve

Search and compare genetics

Use nProve.nz to search breeders and find options that align with your farm goals.

- ✓ Go to nProve.nz
- ✓ Search breeders

More informed conversations

Share your farm's goals to have more productive discussions with your breeder to find suitable rams.

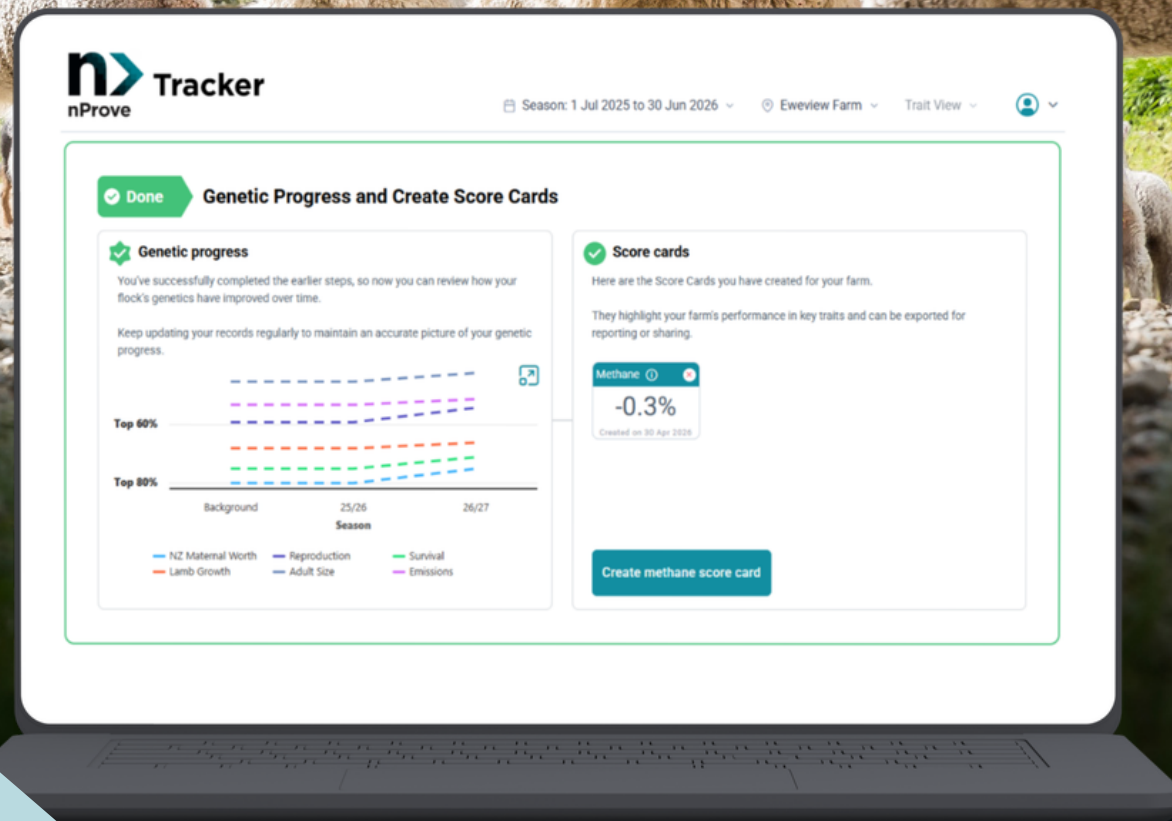

- ✓ Better conversations
- ✓ Stronger partnerships

Choose rams that meet your needs

Use indexes and breeding values to select rams that deliver the traits needed to achieve your goals.

- ✓ Indexes
- ✓ Breeding values

Connect today's sire decisions with future flock performance.

nProve Tracker helps farmers monitor the genetic progress of their flock through the sires they use, providing visibility of how flock genetics are improving over time.
