

# SEDIMENT MITIGATION WEEK

Sediment is the #1 issue in the Pomahaka Catchment.

Environmental Consultant Roger MacGibbon is visiting the catchment to talk about practical options to reduce sediment loss.

**Tuesday 30 October 2018**

## Theory behind sediment movement and mitigation options

7.30pm, West Otago Town & Country Club

**Wednesday 31 October 2018**

## Farming for Profit field day

1.00pm, Bill & Pam McCall's property  
169 Charters Road, Waikoikoi

**Thursday 1 November 2018**

## Practical Sediment Control Solutions

10.30am, Chris Lawlor's property  
565 Webb Road, Waipahi  
(meet at the milking shed)

1:30pm, Alex Restieaux's property  
Meet at the corner of Quartermain and Old Lake Roads, Wairuna

## GOOD MANAGEMENT PRACTICES FOR LATE SPRING

### Fertiliser Application

- Only apply when conditions are suitable i.e. avoid times when soil temperature is too low.
- Don't apply when heavy rain is forecast.
- Keep well away from waterways.
- Avoid application to critical sources areas.
- Only apply fertiliser that can be used by the crop or pasture (test soils to check nutrient status).
- Little and often is better than lots now and then.
